"Devoted exclusively to improving child health care through the use of computers."

CompuKID, The Pediatric Toolkit®

(800) WELL-CHILD

(935-5244)

CompuKID is a computer program that will help maintain your quality care, keep comprehensive pediatric medical records, help reduce liability exposure, alleviate paperwork, and encourage client visits.

Promote Immunization And Well Child Care

- Immunization schedules produced utilizing AAP *Red Book* guidelines
- Growth percentile charts can be displayed and printed in mks (metric) or fps (English)
- Call-back reports, postcards, and letters for immunizations and well child exams
- Prevent missed opportunities with client specific immunization schedules
- Track refused immunizations vs. missed opportunity. What are your *real* immunization rates?
- Immunization schedules, well child anticipatory guidance sheets and growth percentile charts can be printed as client educational handouts. All are printed with client's souvenir photo to encourage usage of material and promote future office visits.

Improve Documentation And Reduce Liability Exposure

- Client photo identification system reduces the chance of using incorrect charts and schedules when insurance numbers are shared by several people.
- Decrease liability exposure through the use of standardized well child and sick exam forms
- Decrease liability exposure with improved encounter documentation.
- Decrease liability exposure with auto reminders for follow-up on missed client referrals
- Pediatric litigation library contains current documentation on pediatric liability suits

Reduce Your Cost Of Providing Medical Care

- Save staff time with computer generated school, child care, and summer camp forms
- Avoid duplicated immunizations, lab tests, and x-rays through better documentation
- Track vaccine inventory, expiration dates, and lot numbers to produce required reports

CompuKID's Support Program Maintains Quality Of Care

- Automatic program updates include changes in immunization schedules and well child exams as recommended by the *American Academy of Pediatrics*©.
- An "enhancement request feature" allows users to request updates, enhancements, and changes to program features automatically.
- Unlimited 800 number support. You will ALWAYS have your questions answered!

Computer literacy is not a prerequisite to use this comprehensive pediatric charting system. *CompuKID* has been designed to be usable by first time computer users...it is pediatrics on a computer screen. After 30 minutes on the system, you may never again refer to our user guide. If you can do it on paper, you can do it with *CompuKID*.
